Dr. Lawrence (Larry) Gaum is an oral surgeon who maintains a private practice in Toronto, Ontario, Canada. He is a graduate of Dalhousie University Dental School in Nova Scotia and is the recipient of several awards throughout his studies. He practiced general dentistry for five years before taking his specialty training in Anaesthesia and Oral Surgery at the University of Pittsburgh and Wilmington Medical Centre. He is a former Associate in Dentistry, Faculty of Dentistry, University of Toronto where he taught for over 20 years. He has lectured extensively throughout Canada, United States and other countries, teaching his fellow colleagues oral surgery, anaesthesia and pharmacology. He is the author of articles on Oral Surgery and Anaesthesia published in major dental and medical journals. He has published a text book and has released a surgical DVD for the general dentist titled: "Oral Surgery for the General Dentist". He is a member of several dental associations in Canada, United States and Europe. He is a staff member of St. Michael's Hospital in Toronto and the Director of Global Professional Seminars.

This course is designed for the general practitioner who wishes to perform his/her own surgery and who rarely refers cases to the specialist.

It is a step-by-step presentation of numerous minor surgical procedures that the dentist can and WILL confidently perform in the office when this hands-on seminar is completed. The participant will perform a large number of procedures utilizing anatomical specimens. The course will demonstrate techniques that have been utilized and updated successfully for over 30 years.

It is important to emphasize that this seminar does not present major Maxillofacial surgery such as osteotomies, fractures, condylectomies, rhinoplasties, etc. that are of no practical or clinical value to the GP. The surgical procedures that will be taught are the "BREAD and BUTTER" variety, allowing the participant to refine and update all surgical skills.

Testimonials:

Excellent course! Dr. Gaum's no nonsense approach and helpful tips improved my surgeries on Monday morning.

- *Dr. Peter Fuzy*

This is a practical, nuts and bolts course. Dr. Gaum demystifies surgical extractions and you will be utilizing the techniques taught come Monday morning.

- *Dr. Robert Fraser*

This course is a must for anyone wanting to take their oral surgery skills to the next level.

- *Dr. Filippo Marchello*

Taking Dr. Gaum's course gave me the training, experience and courage to do what we are suppose to do as dentists – extract teeth. His courses allowed me to become proficient in wisdom teeth extractions and patient management. I now refer less than 1% of my extraction cases; those that I predict will be trouble. His course is one of the best investments of the over 1800 hours of courses I have taken.

- *Dr. Neil J. Gajjar, DDS*

Learning Objectives:

- Performing a proper Examination, Assessment and Preparation of the Patient
- Surgical removal of cysts
- Surgical removal of soft tissue tumours
- Surgical removal of hyperplastic tissue
- Proper techniques for hemostasis
- Incision and drainage of infected tissue
- Frenectomies
 - Maxillary labial (diastema)
 - Mandibular lingual (ankyloglossia)
 - Maxillary labial (prior to fabrication of complete upper denture)
- Surgical removal of impacted and non-impacted 3rd molars
- Surgical removal of erupted molars
- Surgical removal of Tori (mandibular and palatal)
- Surgical exposure of impacted cuspids (pre-orthodontic treatment)
- Post-op considerations, including appropriate use of analgesics, antibiotics and sedatives.
- The "Art" mandibular Block. A refreshing, new, successful approach to accomplishing Regional Anesthesia by blocking the 3rd division of 5th nerve.

Outcome:

Participants will find that the choice of proper instruments for each surgical technique, the proper use of those instruments and the proper surgical techniques, as well as pre-operative patient assessment and post-operative considerations will no longer be complicated nor a mystery. The GP will have the confidence and the skill to perform all of the surgical techniques taught in the seminar.
